

**THE STONEBRIDGE MEN'S CLUB PRESENTS
FORMER ASTRONAUT BOB CENKER
7PM MONDAY MAY 19, 2025 • CLUBHOUSE BALLROOM**

Bob Cenker worked for 18 years at RCA Astro-Electronics, and its successor company GE Astro Space, on a variety of spacecraft projects.

In January 1986, Cenker was a crew member on the 24th mission of NASA's Space Shuttle program, the 7th flight of Space Shuttle Columbia, designated as mission STS-61-C. Cenker served as a Payload Specialist, representing RCA Astro-Electronics. This mission was the final flight before the Challenger disaster, which caused the Space Shuttle program to be suspended until 1988, and impacted NASA's Payload Specialist program for even longer. As a result, Cenker's mission was called "The End Innocence" for the Shuttle program.

Galactic Refreshments include Milky Ways and Moon Pies!
